Step 2: Select your payment method

Based on your country selection, Flywire will automatically display your local currency rate with the appropriate payment options, such as traditional bank transfer or debit/credit card payment.

- Traditional bank transfer (also known as a wire) is the most cost-effective method. Please note that to complete the payment you will need to make arrangements with your bank (in person, online, or over the phone) and send your funds to Flywire in your chosen currency.
- Debit/credit card will allow you to make an online payment in your home currency. Contrary to a traditional international credit card payment, Flywire handles the foreign exchange so you will know the exact amount that will be deducted from your account before you make your payment. Please note that credit card payments are not available in every country.
- Flywire will then convert your currency and pay your institution.
- If you select your home country, but you don't see your home currency, don't worry — you can always pay in the currency of your institution or select a different currency by clicking the “I want to pay in another currency” link at the bottom of the page. Although the process and benefits will remain the same, your bank will handle the foreign exchange before sending the funds to Flywire.
