The Department of Traditional Chinese Medicine (TCM) at Xiamen University was established in 1956. Over this period, it has trained more than 20,000 TCM professionals from over 50 countries and regions, making significant contributions to the development of TCM in China and Southeast Asia.

The Department of TCM is part of the School of Medicine, Xiamen University, which has a strong faculty team of 1,023 staff members, including clinical teachers. The School of Medicine possesses robust clinical resources, with 11 affiliated hospitals ranked as Tertiary Class A (the highest hospital grade in China) and 5 teaching hospitals. It also has leading research capabilities, supported by more than 50 teaching and research institutions, such as the Straits (Xiamen) TCM Science and Technology Platform, the National Virtual Simulation Experimental Teaching Centre for Medicine, the National Clinical Teaching and Training Demonstration Centre, and the National Research Institute for Health Big Data.

The School of Traditional Chinese Medicine at Xiamen University Malaysia (XMUM) serves as a model for the internationalisation of TCM education. Working in close integration with the Department of TCM at the main campus, it is committed to advancing the global development of TCM. Upholding its motto, "Sincere Excellence, Great Healing for the World", the School is dedicated to nurturing future leaders with high professional ethics, a solid theoretical foundation, refined clinical skills, strong research capabilities, and a broad international perspective.

Currently, the TCM discipline at XMUM is supported by an outstanding faculty team, including one National (China) Young Qihuang Scholar, five National (China) Outstanding TCM Talents, and one scholar ranked among the World's Top 2% Scientists (Stanford University list). The School has established a TCM Centre, Herbal Processing Laboratory, Chinese Herbal Garden, and over 30 teaching and clinical internship bases, offering distinctive TCM features and excellent teaching facilities.

Its development focuses on key research areas such as TCM studies in Fujian, Taiwan, and Southeast Asia, tongue diagnosis, dampness-related diseases, Liver diseases, and global health.
